Summary

For the past three to four years I've worked in software and product management. Daneshavaran supplies touch displays, and my work is building the software that adds value on top of them. I designed and built the apps on this site myself, commissioned by a range of clients — from the Iran Wrestling Federation to Fava Technology Park. I also designed Daneshavaran's kids' touch tables and kiosks from idea to product, hardware and software alike. I also led the company's branding for a time, and I've been teaching at university for six years.

Experience

- **Deputy CEO** — Daneshavaran ↗ — Present
- **Software & product management** — Daneshavaran — 3–4 years
- **Branding** — Daneshavaran
- **University lecturer** — 6 years

How I work

Deep thinking

Before designing anything I look at the problem from several angles, and I don't reach for a solution until the picture is clear.

Finding the real need

What people ask for and what they actually need aren't always the same. My job is to find that core need.

From idea to install

I take a product all the way to running on a real display, in a real space, for real users.

Selected projects

Kids Touch Tables & Kiosks
Daneshavaran — in-house product

Technology Park Atlas — Fava Technology Park

Iran Wrestling Hall of Fame
Iran Wrestling Federation

FutureLab — AI Photo Experience
Medical Equipment Exhibition, Milad Tower

TECMALL — Mall Wayfinding

MORA — Executive Second Brain
Dr. Karbasi — Varid Medical Equipment

TashrifatYar — Ceremony Booking

MuseumYar — Visitor Services
Iran Wrestling Federation

ZAER — Conversational AI Guide

FITLY — Virtual Try-on — Joint project — Prodemy
